

I am writing to ask that the FCC NOT implementany any proposal that would lessen Indiana's Telephone Privacy law protection. Prior to the adoption of the law in Indiana we received a minimum of three (3) telephone calls a day and now it is one (1) a week. I should also mention that the calls always came at meal time or at the prime time in the evening and were most annoying. Since all of our children live out of town, we want the telephone lines open for the calls we want not advertisements by tele-a-marketing groups from out of the state.

Thank you for your consideration.
